Solar Irradiance for Several Iraqi Cities

Solar Irradiance is a measure of how much solar power you are getting at your location. This irradiance varies throughout the year depending on the seasons. It also varies throughout the day, depending on the position of the sun in the sky, and the weather. Solar insolation is a measure of solar irradiance over of a certain period, typically, over the period of a single day.

This document is the first of its type in Iraq. It provides the Daily, Monthly, and Annual solar irradiance for 24 Iraqi's Provinces and Cities, including: Abu Ghraib, Baghdad, Baquba, Basra, Basra Qadima, Diwaniya, Falluja, Faw, Hilla, Karbala, Kirkuk, Kut, Mousl, Mousl Jadida, Nasiriya, Omara, Ramadi, Samara, Sinah, Sulaymaniyah, Sumawa, Zubair.

The solar irradiance highly affected by the direction of the solar panels on site. This document presents results for 9 different directions for the solar panels, these are: Facing Directly South, 22.5° South East, 45° South East, 67.5° South East, Facing Directly East, 22.5° South West, 45° South West, 67.5° South West, and Facing Directly West. All angles are with respect to the South.

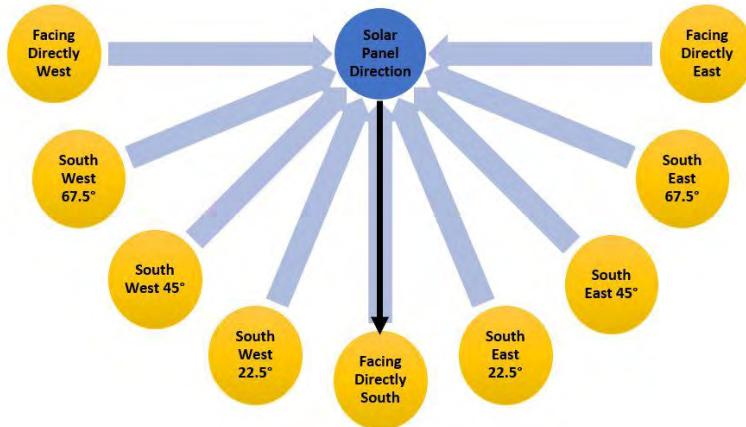

Figure 1. Direction of solar panels. All angles are measured from the south.

The solar irradiance also significantly affected by the inclination (tilt) angle of the solar panel. The results presented are for six different angles for each direction, these are: Vertical, Best Summer Performance, Best Winter Performance, Optimum Year Round, Adjusted throughout the Year, and Horizontal.

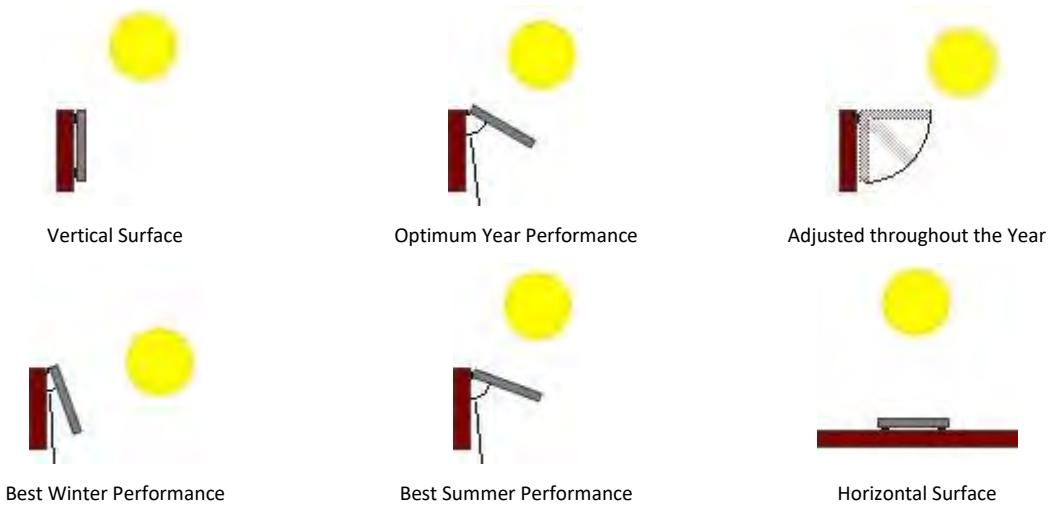

Figure 2. Inclination or tilt angles of solar panels.

The irradiance values that are presented are taken from data collated over 22 years period to provide monthly average insolation figures. This information is then used to calculate the average daily power generation a photovoltaic system will produce in any given month.

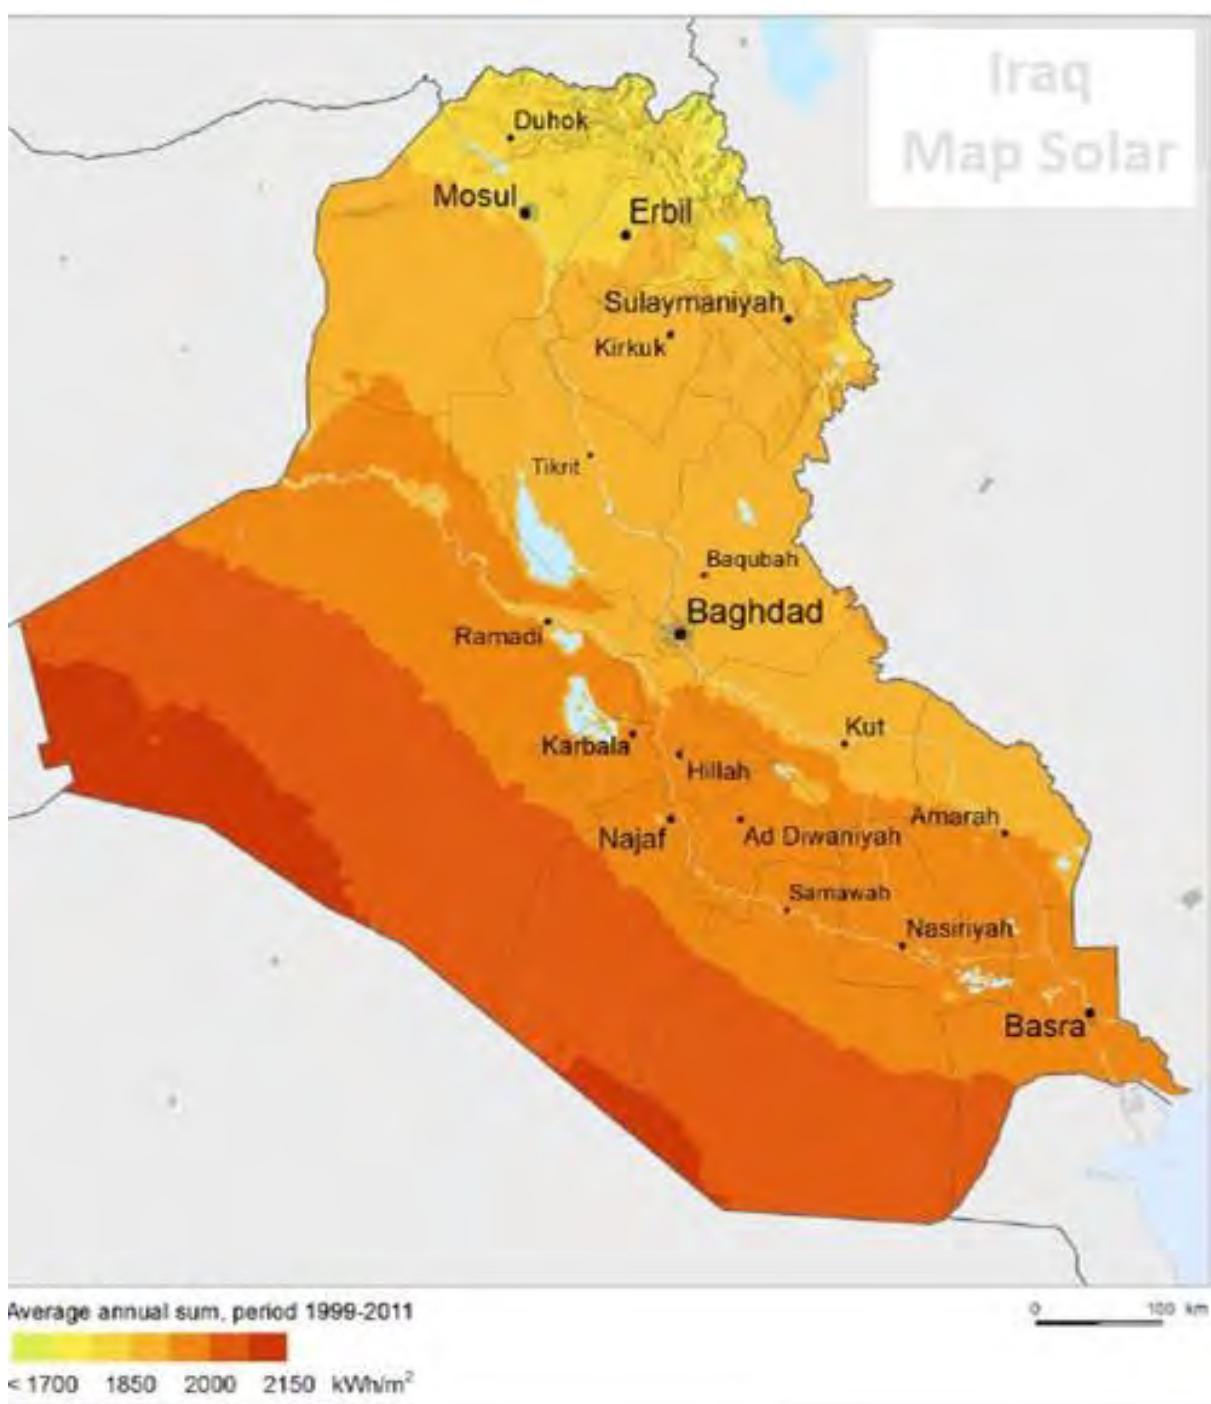

Figure 3. Iraq Solar Map

Table of Contents

Annual Solar Irradiance Summary - Direction of Solar Panel: Facing Directly South	13
Inclination (Tilt) Angle of the Solar Panel (°) - Direction of Solar Panel: Facing Directly South	14
1.1 Daily/Monthly/Annual Solar Irradiance – Abu Ghraib	15
1.2 Daily/Monthly/Annual Solar Irradiance – Arbil	16
1.3 Daily/Monthly/Annual Solar Irradiance – Baghdad	17
1.4 Daily/Monthly/Annual Solar Irradiance – Baquba	18
1.5 Daily/Monthly/Annual Solar Irradiance – Basra	19
1.6 Daily/Monthly/Annual Solar Irradiance – Basra Qadima	20
1.7 Daily/Monthly/Annual Solar Irradiance – Diwaniya	21
